EXPERIENCE

Cohesity — Member of Technical Staff IV

Bengaluru, June 2018 - Present (~8 years)

- Architected a **proprietary, light-weight forms library** to streamline complex workflows, eliminating a legacy third-party dependency, **reducing library size by 83%**, and improving long-term maintainability.
- Drove significant performance enhancements, that included:
 - Cutting development server **build times** by **90% (from 80 to 8 seconds)** by optimising Angular's compilation strategy
 - Implementing **lazy loading** in adapter-specific Source Tree, increasing scalability from a static 10k object limit to on-demand payload.
 - Revamping the Universal Adapter Display component to be highly resilient and configuration-based **increasing developer efficiency by 75%**
- Authored a **Cursor skill** to automate Cloud Adapter integrations via LLM prompts; accelerated onboarding by **~10x (3 weeks to 1-2 days)**; adopted across multiple teams.
- Initiated and led the refactor of Cohesity Views Module, due to a surge in customer issues, resulting in a **100% reduction** in recurring incidents
- Expanded [DataProtect](#) capabilities by integrating new Cloud Adapter workloads (AWS, Azure etc.), enabling **retention of 4 high-priority customers**
- Delivered multiple enterprise features such as Multitenancy, Internationalization (i18n), Data Tiering, and Disaster Recovery by collaborating with product, design, and backend teams helping secure **15+ customer deals**
- Enhanced [SmartFiles](#)' capabilities, contributing to Cohesity's recognition as a Leader and Outperformer in a [GigaOm Radar report](#)
- **Mentored 8+ junior developers** on best practices, code quality, and testing strategies, **increasing code coverage for our team from 60% to 95%** using Cypress E2E tests and Jest UTs

Headout — Software Engineering Intern

Bengaluru, May 2017 - July 2017 (2 months)

- Implemented a new Referral workflow to boost user acquisition rate
- Improved checkout conversion by delivering a new workflow, validated through A/B testing
- Restructured the search filter system to improve user search experience

Classplus — Frontend Developer Intern

New Delhi, May 2016 - July 2016 (2 months)

- Designed and developed the Tutor Dashboard prototype, creating mockups using Illustrator and building the application using AngularJS and Gulp
- Published [angular-gulp-seed](#), an open-source Angular starter template

EDUCATION

Indian Institute of Technology (IIT) Roorkee

2014-2018 · B.Tech Electrical Engineering

FEATURED PROJECTS

Portfolio Website ↗

Awwwards Honorable Mention

300+ GitHub stars · April 2025

Immersive 3D portfolio website, also serves as a template

Todoist-graph ↗

Desktop (MacOS + Windows) · May 2026

GitHub-style activity heatmap for Todoist activity

Reso ↗

Web · May 2026

Experimental music player with realtime visualisations and track analysis.

SKILLS

Frontend

React, Next.js, Angular
TypeScript, CSS/SCSS, Tailwind

3D & Motion

Three.js, react-three-fiber, Drei, GSAP

State & Runtime

Zustand, RxJS, WebSockets, Node, Bun

Testing & Tooling

Jest, Cypress, Vite, Webpack, Vercel
Nx, GitHub Actions, Figma
